DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest a device having all of the limitations of claim 1. In particular, there is no suggestion of an alarm device which is activated by a switch which is connected to a lump in the breast model. While applicant's arguments concerning the "simplicity" of the invention are not especially persuasive (because at first glance it appears that applicant is essentially arguing that the prior art reference has features not disclosed in the prior invention, rather than vice versa), it is nevertheless true that the claims recite a feature which is not suggested in the prior art. Adams, which was cited in a previous rejection, actually teaches away from an alarm device as claimed. While sensor readings have some similarity to an alarm device, Adams also discloses manual switches which are activated by the user to indicate whether a lump was detected. See column 8, lines 55-65. The very purpose of the Adams device is to take measurements from sensors which are **not** immediately transmitted to the user, so that the user can manipulate manual switches and then compare their findings to the sensor reading taken. An alarm device would not allow the user to make their own determinations about whether a lump had been detected, and thus would render the Adams device unsuitable for its intended purpose. The present invention involves teaching at a different level from the Adams device, in that it explicitly indicates when a lump has been felt rather than testing a user by requiring a guess. Because all of the features of

claim 1 are not disclosed or suggested by the prior art, claims 1-8 are allowed. Claims 9 and 13 also recite the alarm device of claim 1; therefore, all claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
